

SOPHIE SIMON SOLVES THEM ALL

For a third-grader, Sophie Simon is one smart cookie. She enjoys teaching herself advanced calculus and has performed successful heart surgery on an earthworm. She's also very clever when it comes to dealing with her clueless parents. But Sophie is no genius when it comes to calculating the high value of friendship--until, that is, she has to use her incredible IQ to help out some classmates with their own parental troubles.

Reader's Opinions

This is a quick and whimsical story told from the view point of 5 different students. Though I feel it would be hard for students to delve into the character's development it was recommended by a couple of fourth grade students. Bonus that it has a female protagonist who is a genius.

Sophie is a smart kiddo who sees the world a little differently than most of her peers. When her one goal can be accomplished by helping others meet theirs, Sophie finds out that it actually is nice to have friends after all. The story is funny with clever...
